## DETAILED ACTION

1. **Claims 1-36** have been examined.

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-11, 16-28 and 33-36 drawn to an apparatus and a method of authentication of entity and a message by generating certificate, classified in class 713, subclass 175.

II. Claim 12-15 and 29-32, drawn to an apparatus and a method of access to resources by login using administrator issued user identifier, classified in class 713, subclass 202.

1. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as certificate authentication of an entity and a message. Invention II has separate utility such as administrator issued user identifier for access. See MPEP § 806.05(d).

Art Unit: 2132

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).  
Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
